William,

I'd search in 239/518,521,524, 550,589,601.

Steve

Subject: Search for 10/720,593

I am examining a case which recites an extrusion nozzle having the following description:

"A method of employing an extrusion nozzle head for extruding sealant material from within a nozzle inlet channel to a recessed space at one end of an interior chamber of a nozzle outlet channel for extruding sealant material from a nozzle outlet opening to a U-shaped receiving channel of an insulated glass assembly...." The sealant material is extruded "from the nozzle inlet channel to the recessed space at one end of the interior chamber of the nozzle outlet channel to the nozzle outlet opening of the extrusion nozzle head by pressure applying means."

I am looking for a search/art related to the particular nozzle structure. The nozzle is illustrated as follows (the recessed portion is labeled 98):

<< OLE Object: Picture (Device Independent Bitmap) >>

Any suggestions?

Thanks!
